

## Developer Assessment

Please choose one of the options below, depending on the position you are applying for.

### **1) Front-End Development Assessment**

The link below will download a psd that we would like you to slice up and make a html design / website. Basically what you will need to do is convert that psd to a website and make it ready to be converted by a backend developer.

[http://www.gsdh.org/assessments/wordpress/2015/07/EigCrustag\\_OverviewPage.zip](http://www.gsdh.org/assessments/wordpress/2015/07/EigCrustag_OverviewPage.zip)

### **2) Full-Stack Development Assessment**

- Please build a basic news manager with CRUD functionality
- Include a basic front end for viewing the articles. Style this as you like.
- Ensure that you are following all the relevant Coding Standards
- Add comments or Doc Blocks to your actions / methods
- Please use the Laravel Framework for your MVC structure
- Please style your application with Bootstrap

Please take the time you need to complete the test and show us your skills. After completion please send the results to [tanja@gsdh.org](mailto:tanja@gsdh.org) soon as possible :-)

Good Luck! 😊
